The first use of writing is attributed to the Sumerian city of Uruk. Simplification of the characters in earlier pictographic script led them to the idea of using conventional symbols to represent the sound of a word rather than the idea it conveyed. Motifs in painted pottery indicate that a script incorporating phonetic elements was in use in Uruk by 3700 BC (modern Warka).

The Maya were so exact in their time reckoning that it is possible to date their monuments with respect to la. other to the precise day. Difficulties arise in translating Maya chronologies into modern chronologies.

The zero date of the Maya chronologic era, "4 Ahau 8 Cumhu", was set at Feb. 10, 3641 BC by Charles P. Bowditch & Thomas A. Joyce. It was set at Oct 14,

Before taxation, human beings gave their personal wealth away, thus increasing prestige while maintaining material equality. What barocrats demanded ceased to be a moral obligation, and 5600 yrs ago (3,600 BC) class distinctions became conspicuous for the first time.

The political lineaments of the modern world began to appear 5600 yrs ago (3600 BC) in Mesopotamia, with the first tax demands issued by parceling up the clay accountancy tokens in clay envelopes marked with official seals. Some bright clerk then thought of dispensing with the tokens and envelopes and making his marks on flat clay tablets.
